

## **Agricultural Research Internship**

The Conservation Learning Centre (CLC) is an Agri-ARM site located 18 km south of Prince Albert, Saskatchewan. The CLC promotes profitable and sustainable agriculture through research and technology transfer activities that are of interest to local producers. We also offer a school program to students providing quality learning through hands on activities at the farm. To find out more, visit our website ([www.conservationlearningcentre.com](http://www.conservationlearningcentre.com)). The CLC is looking to hire an Agricultural Research Intern for the 2019 growing season (May-October). An extension may be possible.

### **Duties and Responsibilities:**

- Field preparations and flagging of sites
- Seed cleaning, seed treatment, and set up of seeding envelopes
- Seeding of small plot field trials
- Operating small plot field equipment such as tractors, seeders, sprayers, and tillage tools
- Driving a truck and trailer to move equipment between sites
- Taking accurate and precise field notes during data collection
- Report writing
- Operating a small plot combine or swather
- Fall Land preparation
- Equipment calibration and maintenance
- Assisting technicians and agronomists
- Yard maintenance
- Gardening (planting, weeding, harvest)
- Leading school group tours
- Helping host field days

### **Skills/Experience:**

#### **Required:**

- Punctual, reliable and able to work outdoors
- A high level of attention to detail resulting in consistent outcomes
- Proven problem solving and critical thinking abilities in team and individual settings
- Exceptional communication and organizational skills
- A valid class 5 driver's license
- Post secondary graduate from an agricultural or natural science program

#### **Preferred:**

- Small plot field trial experience and/or farm experience
- Mechanical aptitude with farm machinery

**Please submit a cover letter and resume to [info@conservationlearningcentre.com](mailto:info@conservationlearningcentre.com)**
