

Seasonal Research Field Technician

The Conservation Learning Centre (CLC) is an Agri-ARM site located 18 km south of Prince Albert, Saskatchewan. The CLC promotes profitable and sustainable agriculture through research and demonstration transfer activities that are of interest to local producers. We also offer a school program to students providing quality learning through hands on activities at the farm. The CLC is looking to hire a seasonal field technician (May-October). While the primary responsibility will be the operation and maintenance of small farm equipment, the technician will also oversee our grain bag recycling program. Below is a list of typical duties that the technician will be involved with and a list of desired skills/experience. Pay dependant on experience.

Duties and Responsibilities:

- Field preparations and flagging of sites
- Seed cleaning and seed treatment
- Operating small plot field equipment such as tractors, seeders, sprayers, swather, plot combine
- Driving a truck and trailer to move equipment between sites
- Operating irrigation equipment
- Equipment calibration and maintenance
- Assisting technicians and agronomists
- Yard maintenance
- Gardening (planting, weeding, harvest)
- Helping host field days
- Unloading grain bags
- Organizing loaning of grain bag roller

Skills/Experience:

Required:

- Punctual, reliable and able to work outdoors
- A high level of attention to detail resulting in consistent outcomes
- Proven problem solving and critical thinking abilities in team and individual settings
- Exceptional communication and organizational skills
- A valid class 5 driver's license

Preferred:

- Small plot field trial experience and/or farm experience
- Mechanical aptitude with farm machinery
- Currently enrolled in or finished an undergraduate degree program in agriculture or a related natural science

Please submit a cover letter and resume to info@conservationlearningcentre.com
